

## QUICK•STEP® REPAIR KIT

### Product description

Repair kit for damaged laminate, LIVYN or parquet floors.

Packaging quantity: 1

Contents: 1 melter, 1 cleaning comb, 1 grey sanding pad, 1 green/white pad, 7 wax blocks and 1 instruction manual.

### Applications

Quick-Step® laminate, LIVYN and Parquet stand for quality. The laminate floor consists of a hard core of a high-quality HDF board, which makes the Quick-Step® floor extremely wear and impact resistant. Quick-Step® is also a laminate with an exceptionally resistant wear layer. Quick-Step® Parquet floors are composed of 100% natural materials and treated with lacquer or oil for optimal protection.

When a very sharp object falls on the floor from a fair height (e.g. the point of some scissors), it is sometimes unavoidable for the floor to sustain slight damage. The Quick-Step® Repair kit can be used to repair the light damaged area.

### Specifications

- √ Matching repair  
The Quick-Step® Repair Kit offers a matching solution for every Quick-Step® Laminate and Quick-Step® Parquet floor. This enables you to optimise the colour to the shade that best matches the damaged plank.
- √ Easy and fast  
The room looks nicely finished, without having to change the damaged plank.
- √ A complete repair kit  
All the elements needed for repairing every Quick-Step® floor are available in one and the same kit.

## Instructions for use

### **1). Preparation:**

Proper preparation is important. Clean the damage on the floor first and make sure it is free from dust, oil, wax and grease.

### **2). Choose your colours:**

Choose your colours according to the recommendations on [www.quick-step.com](http://www.quick-step.com)

### **3). Melt and Mix**

**4). Filling**

**5). Levelling:**

Use the sharp edge of the filler to scrape off excess material.

**6). Precise adjustment:**

For a precise adjustment of the wood pattern you can scratch the area to be restored with a pointed item and fill it with a darker colour.

**7). Degrease using the grey sanding pad**

**8). Adjust the gloss level:**  
Use the green side of the green/white pad to make the area more glossy.  
Use the white side to make it more matt.
